Fremont, Ohio 43420

October 24, 1977

Attn: Mr. Peter Williamson, Vice President

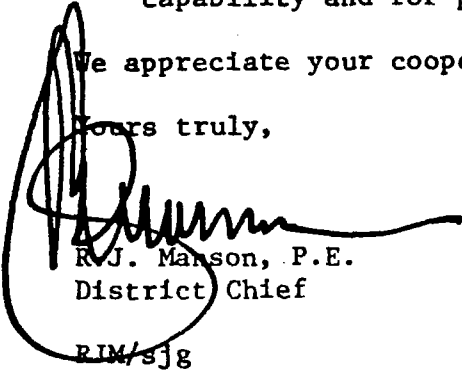

Dear Mr. Williamson:

This letter will serve to outline the present status of your operations.

- 1) There is presently no hazardous waste facility permitting program in the State of Ohio.
- 2) Your company cannot be issued an NPDES permit since there is no discharge off-site to a surface stream.
- 3) Plans have been approved by this Agency and permits issued by the Ohio Department of Natural Resources for the operation of a deep well injection system.
- 4) Plans have been approved and a system is in operation for pretreating and hauling materials to wastewater facilities under permit.
- 5) An oil-water separation facility has been installed and is operational.
- 6) You are in compliance with a voluntary schedule for additional capability and for phasing out the storage lagoons.

We appreciate your cooperation in implementing these actions.

Yours truly,

R.J. Manson, P.E.  
District Chief

RJM/sjg
